Auben Smart-Services:
A10 ADC Assessment

Validate and guarantee your Application Delivery with Our Smart Services

Are you looking for an expert health-check on your application delivery configuration?
Our Smart Services for A10 ADC Solutions will provide you with a full review of your deployment and provide recommended best practices accordingly to ensure your business can fully harness the power of A10 Networks' industry-leading Application Delivery Controllers by using industry best practices.
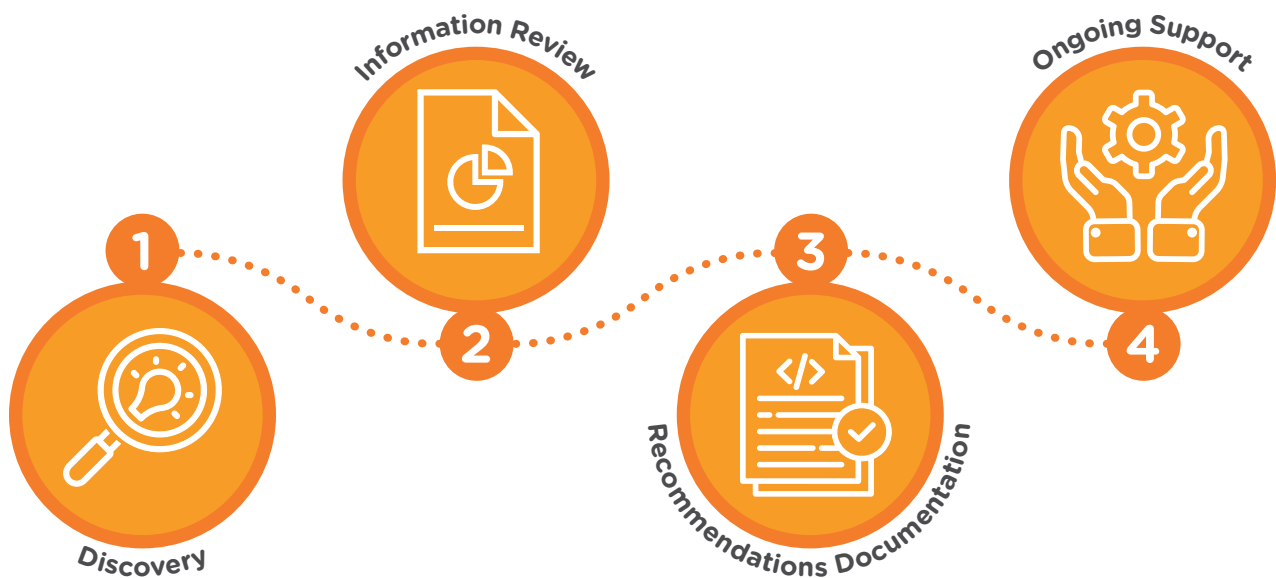

Why Choose Our Quick-Start Services?

Rapid Review: Our experienced team of experts will ensure a smooth and swift review process, minimizing downtime and maximizing productivity.

Best Practices Recommendations: Benefit from our in-depth knowledge of A10 ADC solutions as we follow best practices aimed at optimizing performance and security.

Expert Guidance: Our certified professionals will guide you through every step, from initial review to final recommendations, using production verified and validated designs.

Optimized on what is really needed: Competitive pricing by optimizing the assessment process.

What's Included?

1 Discovery
2 Information Review
3 Recommendations Documentation
4 Ongoing Support

What are the options available?

Smart Packages Options and Parameters

Smart services consider a deployment model with a set of parameters. Also, in order to scale the proposal and adjust it to your needs, options to scale with add-ons can be considered for the project. Our team will help you choose the right package and Add-Ons for your environment. All A10 Thunder ADC families (including hardware and virtual appliances) are considered for this service.

Parameters	Description	In Scope	Add-Ons
Thunder ADC Devices Clusters	The number of HA Clusters included	Up to 2	Additional Clusters (Per unit)
